*Version 1 has a 2K RAM which is a 24-pin IC at location 5D.

*Version 2 has an 8K RAM which is a 28-pin IC at location 5D.

Power-up CPU Self Tests

Upon power-up, the CPU board performs a series of self tests of major components. Turn the game on while observing the LEDS on the CPU board. Tests of the PIAs, RAM, and EPROMs are performed automatically and results of the test are indicated by the PIA LED.

With all tests passed, the LEDs illuminate in the following sequence at power turn-on. The PIA and + 5V LEDs illuminate immediately. Approximately 1/2-second later the PIA LED goes out and the Blanking LED illuminates; the + 5V and Blanking LEDs remain illuminated until the game is turned off. Test failures are indicated with the PIA LED:

PIA LED

- Stays On
- Flashes 1 Time
- Flashes 2 Times
- Flashes 3 Times

SUSPECT COMPONENT

- One of the 6821 PIAs
- 6064 RAM at location D5.
- EPROM at location B5.
- EPROM at location C5.

GAME SPECIFICATIONS

POWER REQUIREMENTS

This game is provided with a 3-prong plug and must be connected to a properly grounded outlet to reduce shock hazard and insure proper game operation. Refer to AC Power Wiring Diagram for transformer connections required for normal, high, and low line conditions.

Normal Line: 109 to 129 Vac (211 to 225 Vac)

High Line: (226 to 235 Vac)

Low Line: 95 to 108 Vac (200 to 210 Vac)

MAJOR ASSEMBLY AND FUSE LOCATIONS

Refer to the Game Illustration (page 2) to identify locations of the major assemblies, and fuse values and locations.

PROM SUMMARY

CPU Board: Location 5C

Sound Board: Locations U17 (Voice ROM 1), U21 (Voice ROM 2), and U7 (Sound ROM)

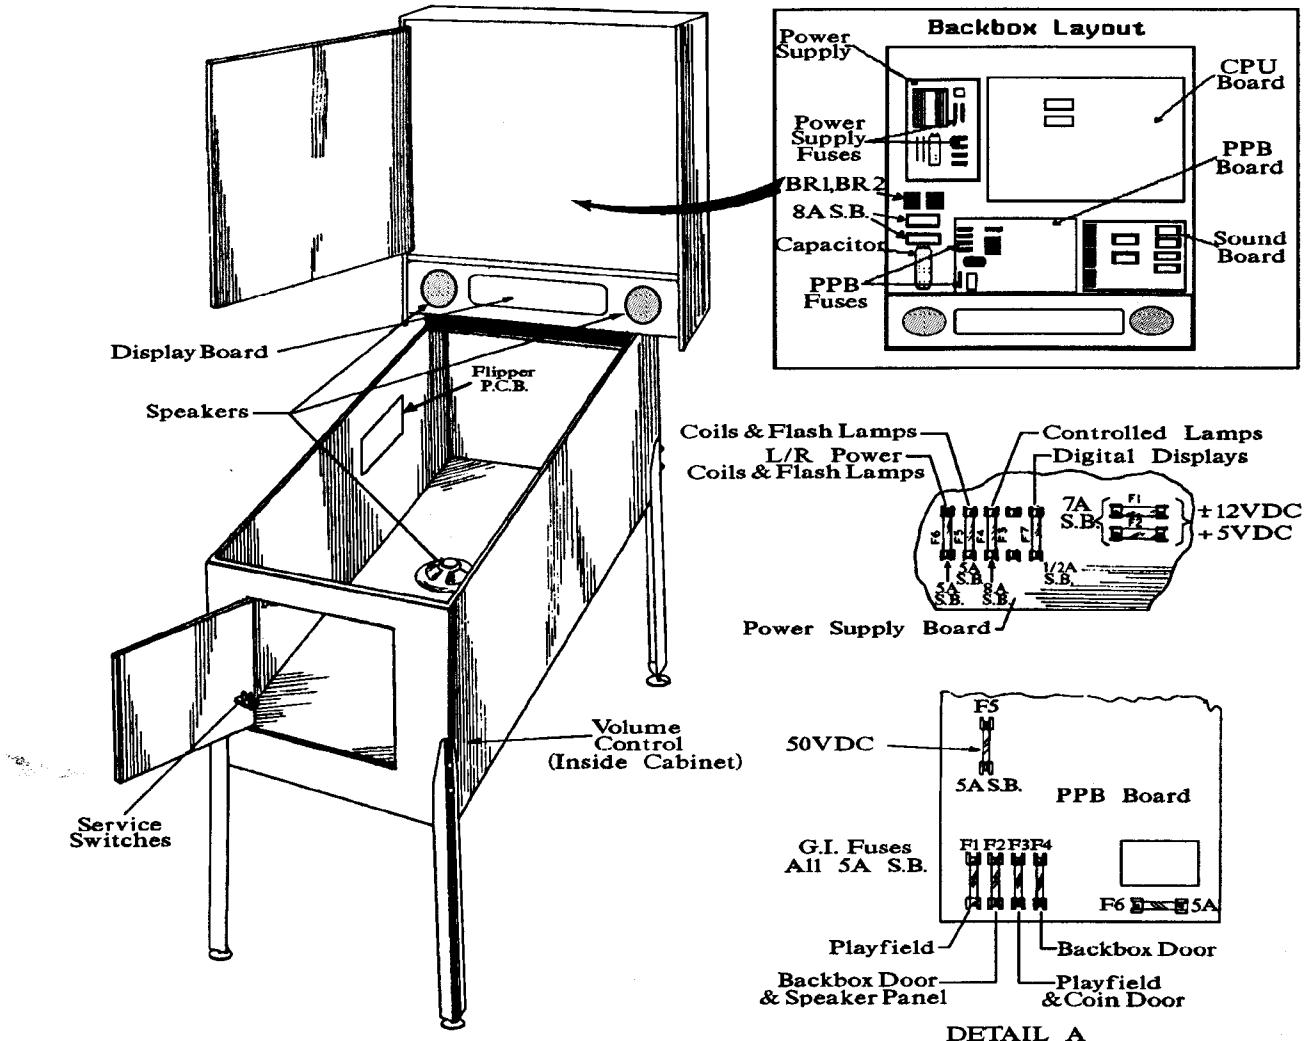

Display Controller Board: Locations U12 & U14

TRANSPORTATION

To reduce the possibility of damage, observe the following precautions whenever transporting the game. Lower the backbox and secure it to the cabinet. Remove the legs and secure the game within the transporting vehicle.

GAME ASSEMBLY PROCEDURES (Refer to the Game Illustration on page 2)

1. Open the top of the carton and lay it on its side with the bottom of the cabinet down. Using the plastic banding strip as a handle, slide the game out of the carton.
2. Remove all packing material. Locate cabinet legs in filler packing inserts and assembly parts package in the cashbox. There should be four leg levelers, eight leg bolts, three pinballs and a large Allen Wrench used for securing the backbox.
3. Attach leg leveler from the parts package to each leg, make sure that each leveler is threaded through a hex nut before threading it into the leg.
4. Support rear of cabinet and attach rear legs using two leg bolts for each leg.
5. Support front of cabinet and attach front legs using two leg bolts for each leg.
6. While assuring that no cables are being pinched, carefully raise the backbox and secure it in its upright position by inserting the Allen Wrench in the hole in the back of the cabinet and rotating the wrench 270 degrees(3/4 turn).

GAME ILLUSTRATION

7. Remove the backbox keys from the clip on the inside of the coin door and unlock and carefully remove the backglass. Set the backglass aside.
8. Carefully remove the playfield glass and set it aside.
9. Check all connectors in the backbox for loose wire terminations. Reseat any loose wire by pushing in on the terminal.
10. Push on all connectors plugged into the CPU board, Sound Board, Power Supply Boards, and (on insert board) Display board to check that they are properly seated.
11. Check that the fuses on the Power Supply board, PPB board and fuse panel are seated properly.
12. Raise the playfield and the support bar on the right side of the cabinet; support the playfield by inserting the support bar into the countersunk notch on the bottom side.
13. Check all cabinet cable and playfield lamp board connector terminations.

14. Remove the Plumb tilt from the parts package and install on the panel on the inside left of the cabinet. Note that this game is not equipped with a ball roll tilt.

15. Lower the playfield and level the playfield side-to-side by adjusting leg levelers and using the 2 Way Level located beneath the pricing card on the bottom arch.

16. Using the 2 Way Level below the pricing card, adjust the pitch of the playfield to approximately 6.5 degrees.

NOTE

The playfield incline affects difficulty of play. Use the recommended incline; game difficulty is best varied using game adjustments.

17. Check the plumb tilt and adjust as required.

18. If desired, perform any self tests at this time. With the insert door closed, carefully reinstall and lock the backglass.

19. Place the three pinballs on the playfield near the outhole and carefully reinstall the playfield glass.

20. If desired, make game pricing and Add-A-Ball, Novelty, or 5-Ball Play adjustments at this time.

GAME OPERATION

STANDARD FEATURES

Insert coin(s), the game makes a sound for the first credit and generates sounds for each subsequent coin and the Player 4 display indicates the number of credits posted. Depress the credit button and a start-up sound is produced, the posted credits are reduced by one, Player 1 display flashes, Player 4 display indicates BALL 1, and a ball is served to the plunger trough. Additional players may be added by depressing the Credit button before the end of ball 1.

The second closure (adjustable) of the plumb bob tilt switch tilts the ball in play. Closure of the slam tilt switch in the coin door ends the current game(s).

At the end of each ball, earned bonuses are collected. At the end of the last ball for the last player and after bonuses are collected, the system produces a random 2-digit number (a multiple of 10; 00 to 90) for a Match feature (adjustable). Matching the last two digits of a player score with this number awards a credit. Players exceeding high score levels receive free credits (adjustable) and are able to enter their initials with the new High Score achieved. The game then proceeds into the game-over mode and then to the attract mode. A custom message (adjustable) can be displayed during the attract mode.

MANUAL PERCENTAGING

This game is equipped with Manual Percentage Adjustment.

As previously with our games, you can either set operator adjustments for a replay percent or you can set a fixed replay score.

If you set operator adjustments for a particular replay percent, the game will compute a recommended score to keep the game at that replay percentage. If a change is recommended and the game coin door is opened, the displays will indicate a recommended replay score to beat and make a sound to alert the operator. By pressing the start button, the score to beat will be changed to the recommended level. If you close the coin door or go into audit or adjustment mode, no score change will be made.

You may choose to ignore the recommended change; for example, you may not think last week's players were the usual crowd. Just close the door and the message will disappear without altering the existing level. Or you may choose to make a different score to beat adjustment; this is done by utilizing adjustment AD02.

GAME SPECIFIC FEATURES

Skill Shot

Pull trigger of gun handle located at the front of cabinet when moving lit target(display) is in sharpshooter's sights.

Multiball

Clear either of drop target banks (1) to light red, yellow, and then blue lights. (2). This lights Multiball ready at VUK hole (3). Shoot ball into VUK hole to begin Auto 3 Ball.

Second Multiball may be initiated by satisfying above criterion on other Drop Target bank (1).

Jackpot

Multiball only- Hitting ramp (4) awards Jackpot. Two balls on the ramp at the same time awards Double Jackpot. Following Double Jackpot with two consecutive shots around the subway (5) awards Quadruple Jackpot. Hit lit saucer (6, 3, or 7) to re-qualify Jackpot.

Multiplier

Completing the three top lanes (8) advances Bonus Multiplier. Shooting subway (5) spots a lane.

Laser Kick

Laser Kick (9) is lit at the start of each ball. Re-light Laser Kick by hitting lit target (10).

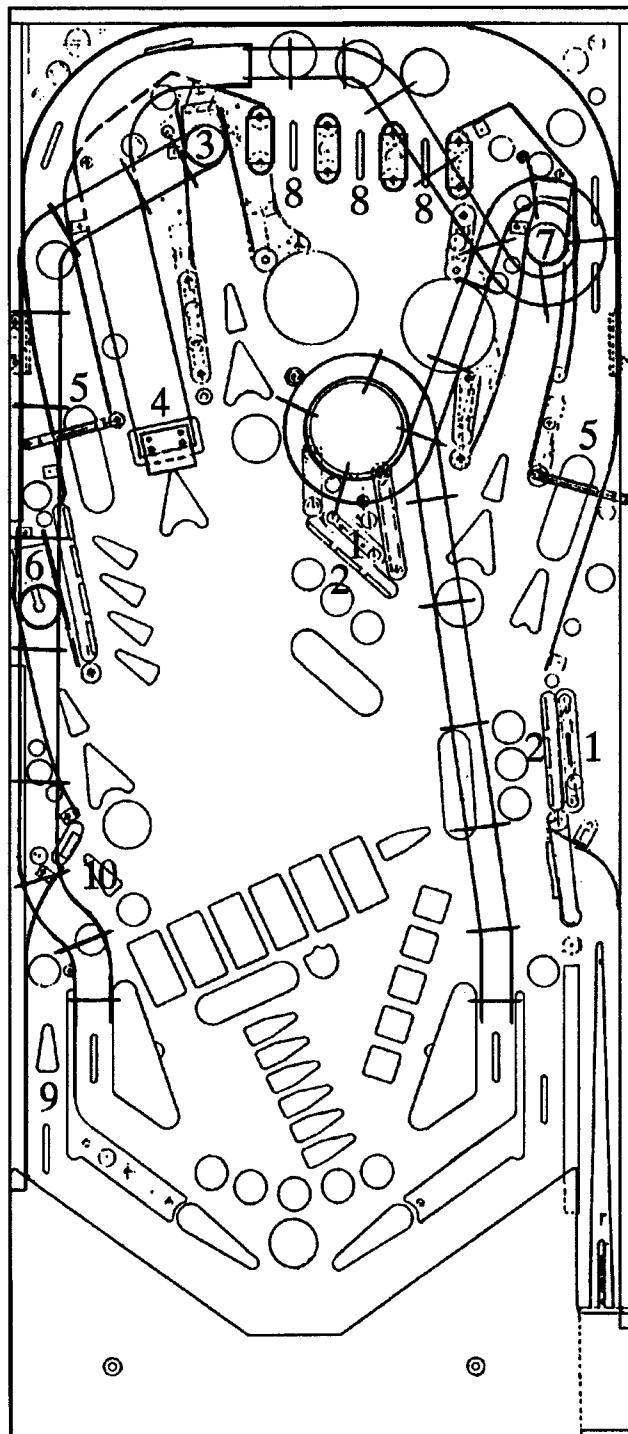

Light target (10) by completing two consecutive trips around the subway (5).

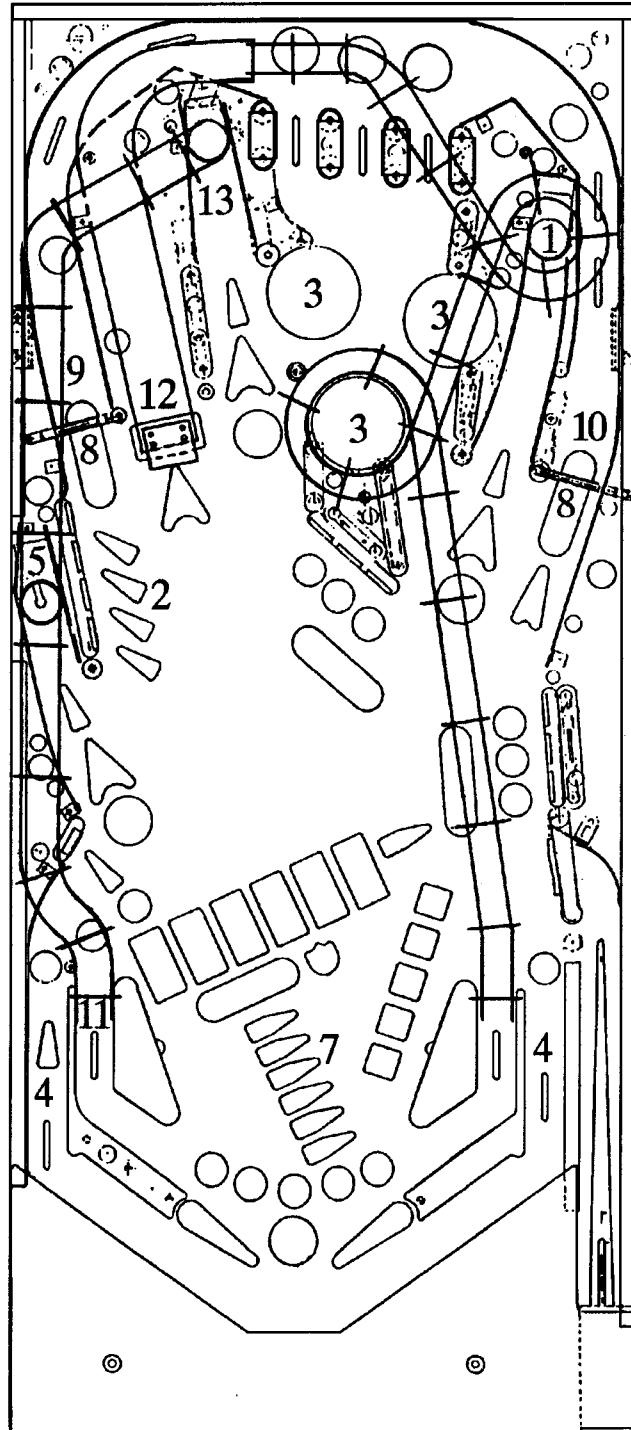

Red Wire / Blue Wire

Initiate Red Wire/Blue Wire by hitting center target at either Drop Target Bank (1). Then choose either remaining target to find the right wire (chosen randomly). Correct choice leads to lighting Unlimited Millions light on target (10).

Lethal Weapon 1-2-3

Shooting all three saucers (6, 3, 7) awards a stunt. Each stunt awards points and a short display animation.

Leo Getz

Light Leo Getz on saucer (1) by completing bullet targets (2). Shoot saucer (1) to win Leo Getz. Leo Getz scores one of the following (random choice):

- a) Maximum Multiplier and Bonus Hold.
- b) Super Pops-Turbo bumpers (3) worth 100K or 1 Million.
- c) Murtaugh's Retirement- Lights outlanes (4) for a random value between 3 and 5 Million.
- d) Mystery score- scores a random value.
- e) 1 Million points.
- f) Lights Multiball ready.
- g) Lights Extra Ball for saucer (5).
- h) Awards stunt.

Shoot-Out

Shooting subway (9,10) lights Bullets on Uzi (7). Filling Uzi clip (lighting all six bullets) begins Shoot-out. Pull trigger of gun handle at front of cabinet to shoot adversary (pictured in display) before he opens fire. The later you wait (without being shot) and the more bullets you use, the higher the score awarded.

Winning Shoot-Out awards (in order):

- a) 3 Million.
- b) 1 Million & Bonus Hold.
- c) Lights Super Leo Getz and Super Spinners. Super Spinner timer begins when either spinner (8) is hit. Hitting spinners by shooting subway (9, 10) before timer expires awards Unlimited points.
- d) Lights Video and Getaway. Getaway-shooting left ball return (11) and then right subway (10) scores Getaway bonus.
- e) Crazy Riggs.
- f) Looping- Start looping timer by shooting Freeway (12). Each trip on the Freeway before timer expires awards 10 Million.
- g) Super Lethal Weapon- Shoot saucers (1, 5, 13) for 10 Million before timer expires.

Super Leo Getz

Score Super Leo Getz in saucer (1) while Leo Getz light is flashing. Super Leo Getz awards one of the following (random selection):

- a) Special.
- b) Extra Ball
- c) Crazy Riggs- a timed -fast scoring mode with every switch closed scores 250K.

Video

Enter Video Mode by hitting VUK hole (2) with video lamp lit. Pull trigger on gun handle at front of cabinet when a spinning target (display) shows a criminal. Exits video mode when ten shots have been fired, ten targets have been displayed or the player shoots a civilian target.

Bonus

Bonus is increased by 5K with every switch closure. Bonus awarded at end of ball.

Special

Special is awarded by Super Leo Getz.

Victory Laps

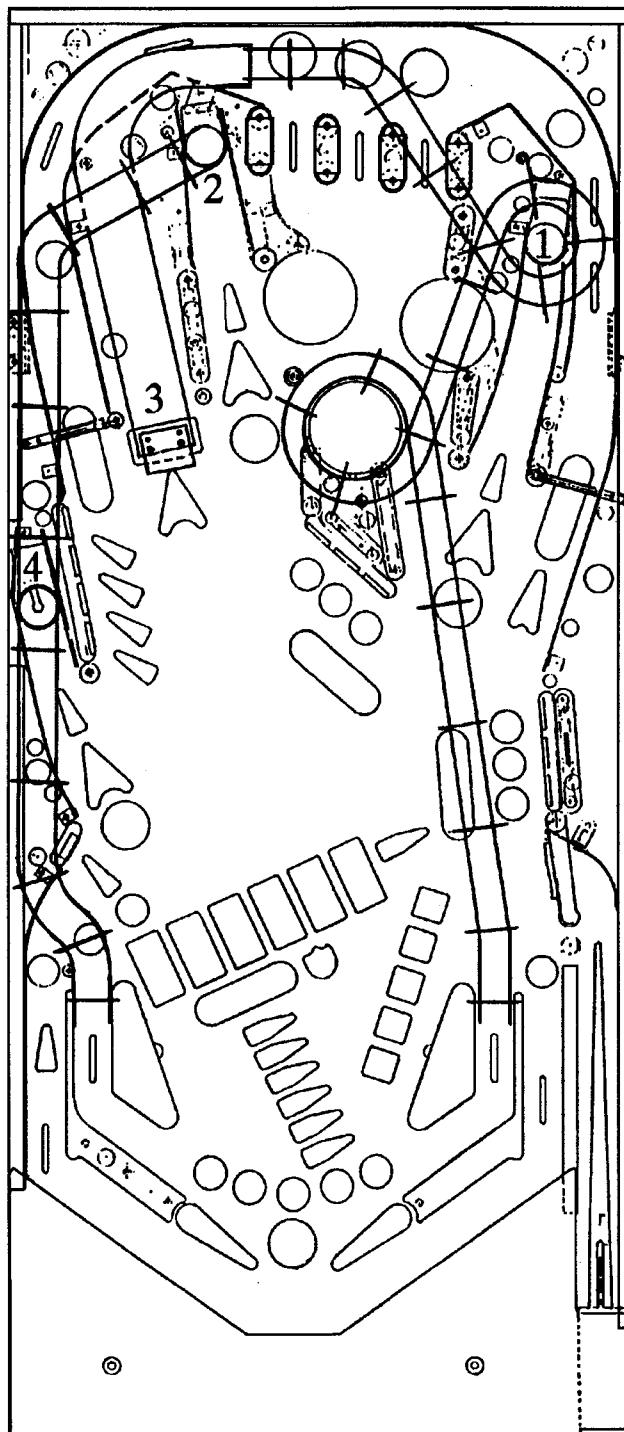

Shoot Freeway (3) after Special is awarded and before victory lap timer expires to score 25 Million.

Freeway

Consecutive shots on the Freeway ramp (3) scores Millions & Extra Ball lit. Extra Ball lights on saucer (4), and is scored by shooting saucer (4) with light lit.

Fight Mode

Fight mode is awarded randomly upon entering one of the holes (1, 2, 4). Fight begins on display. Press Flipper buttons rapidly to command Riggs to throw punches. Throwing more punches than the adversary wins fight and scores big.

AUDIT FUNCTIONS

GENERAL

There are 97 audit functions provided for accounting purposes and for evaluation of game difficulty adjustments. Audit functions are split into two groups. There are nine most-used audits (AU01 through AU09) in a 'quick look' group and 87 less-used audits (E AU11 through E AU97), in an 'expanded' group. The various auditing functions are summarized in the **AUDITING FEATURES TABLE** and, when accessed, are shown on the player score displays. The *Audit Number* is shown in the Player 3 Display, the *Description* in the Player 1 and 2 Displays, and the *Audit Total* in the Player 4 Display. Access and control is provided from switches located on the inside of the coin door.

To access audit functions, open the coin door and make sure that the FORWARD/REVERSE switch is in the FORWARD (up) position. Depress the STEP switch and the game name is shown in the Player 1 and 2 displays, the Player 3 display is blank, and the PROM revision level is shown in the Player 4 display. This indicates access to audit functions.

With the FORWARD/REVERSE push-button switch still in the FORWARD (up) position, depressing the STEP push-button switch advances through the audit functions one at a time. To review lower-numbered functions, set the forward/reverse push-button switch to the REVERSE (down) position and operate the STEP push-button switch.

To access expanded audits, operate the step push-button until AU10, EXPAND AUDITS is displayed. Set the choice to ON as indicated in the Player 4 display by depressing the Game Start push-button and then depress the step push-button. The request is installed and E AU11 is displayed. When you exit audits and adjustments, the AU10 setting is returned to off for the next time that a review of audits are required.

Audit totals may be reset to zero using Game Adjustment **Ad11**, Audits Reset. Game adjustments (Ad01 to Ad13 and E Ad14 to E Ad56) begin after the last audit function (AU10 or E AU97). Once audits functions have been recorded, and if no adjustments are required, you may return the game to the attract mode. If adjustments are required, continue pressing the STEP button until the game adjustments are reached. See Game Adjustments for details.

'QUICK LOOK' FUNCTIONS

Total Paid Credits (AU01) - the total number of paid credits is displayed.

Free Percent (AU02) is Free Total (E AU24) divided by Plays Total (E AU25).

Ball Time Average (in seconds) (AU03) is Total Play Time divided by Total Balls Played (AU10).

Average Game Time (AU04) is the Average Game Time expressed in minutes and seconds.

Coins (AU05, 06, 07 and 08) - These four audit totals are provided to show the amount of coins registered for the left, right, center, and 4th coin chutes, respectively.

Total Coins (AU09) is the total number of coins dropped through all 4 coin chutes.

Expand Audits (AU010) permits viewing of expanded audits.

EXPANDED FUNCTIONS

Balls Total (E AU11) is the total of regular and extra balls.

Extra Balls Total (E AU12) is the total number of extra balls awarded.

Extra Ball Percentage (AU13) is AU12 divided by Plays Total (AU26).

Replay Awards (E AU14 through 17) provide the total awards (credit, extra ball, or audit) for replay levels 1 through 4, respectively.

Total Replays (E AU18) is the total awards (credits, extra balls, or audit only) for exceeding replay score levels.

Replay Percentage (E AU19) is the Replay Total awards for exceeding replay score levels (E AU18) divided by Plays Total (E AU26).

Total Specials (E AU20) is the total awards (credits, extra balls, or scores) for making specials.

Special Percentage (E AU21) is Special Total (E AU20) divided by Plays total (E AU26).

Match Total (E AU22) is the total credits awarded for matching the last two digits of the score with the system-generated Match Number at the end of the game. Percentage of match credits will be adjustable from 0% to 10%, by E Ad 14 if enabled.

High Score Wins (E AU23) is the total credits awarded for exceeding the high-score-to-date scores.

High Score Percentage (E AU24) is High Score Wins (E AU23) divided by Plays Total (E AU26).

Total Free Plays (E AU25) is the total free credits for replays, high-score-to-date, specials, and match.

Total Games (E AU26) is the sum of Total Paid Credits (AU01) and Free Total (E AU25). Note that free credits are not recorded in the audits until they are actually used.

0.0- 19.9 Million (E AU27) provides the total number of games the Player's final score was between 0 and 19,999,990 points.

20.0 - 39.9 Million (E AU28) provides the total number of games the Player's final score was between 20,000,000 and 39,999,990 points.

40.0 - 59.9 Million (E AU29) provides the total number of games the Player's final score was between 40,000,000 and 59,999,990 points.

60.0 - 79.9 Million (E AU30) provides the total number of games the Player's final score was between 60,000,000 and 79,999,990 points.

80.0 - 99.9 Million (E AU31) provides the total number of games the Player's final score was between 80,000,000 and 99,999,990 points.

100 Million Plus (E AU32) provides the total number of games the Player's final score was over 100,000,000 points.

Average Scores (E AU33) provides the Average Score by adding the Final Score of each game to a table and dividing this sum by the Total Plays .

Games - Player (E AU34 through 37) provide individual totals of 1-player, 2-player, 3-player, and 4-player games, respectively.

Attract Minutes (E AU38) provides the number of minutes the game is in Attract Mode (Factory use).

Cycles High Score Reset (E AU39) provides the number of times that the high score levels have been automatically reset (if enabled).

Coin No Credit (E AU40) provides the number of times the coin switch was closed without awarding credit(s)-This option is used in multiple coin conditions.(ie. 2 quarters 1 Play)

Service Credits (E AU41) provides the total number of Service credits added to the game. *See Game Diagnostics on page 19 for instructions regarding entry of Service Credits.*

Proprietary (E AU42 - E AU45) provide information to the game designer to aid in design development. (Factory use only.)

Total BuyIn Games (E AU46) provides the number of times a player utilized the Buy In Feature. (See E Ad 40)

Drains Left (E AU47) provides the number of times the ball drained out the left drain.

Drains Center (E AU48) provides the number of times the ball drained out the center drain.

Drains Right (E AU49) provides the number of times the ball drained out the right drain.

GAME SPECIFIC FUNCTIONS

Extra Ball Lit From Ramp (E AU50) provides the total number of times the Ramp lit the Extra Ball light.

Extra Ball Lit From Leo (E AU51) provides the total number of times the Leo Getz feature lit the Extra Ball light.

2X Made (E AU52) provides the number of times 2X bonus was enabled.

4X Made (E AU53) provides the number of times 4X bonus was enabled.

6X Made (E AU54) provides the number of times 6X bonus was enabled.

8X Made (E AU55) provides the number of times 8X bonus was enabled.

of Bonus Holds (E AU56) provides the number of times Bonus Hold was enabled.

Super Leo ExBall (E AU57) provides the number of times the Super Leo Getz feature lit the Extra Ball light.

Laser Kick Used (E AU58) provides the number of times the Laser Kick returned a ball into play.

Freeze Used (E AU59) provides the number of times the Freeze Feature was enabled.

Multiball Lit (E AU60) provides the number of times the Multiball Feature was lit.

Multiball Award (E AU61) provides the number of times the Multiball Feature was awarded.

Rerace Award (E AU62) provides the number of times the Rerace Feature was awarded.

Jackpot Lit (E AU63) provides the number of times the Jackpot Feature was lit.

1 Jackpot Award (E AU64) provides the number of times 1 Jackpot were awarded.

2 Jackpot Award (E AU65) provides the number of times 2 Jackpots were awarded.

3 Jackpot Award (E AU66) provides the number of times 3 Jackpots were awarded.

4 or More Jackpots (E AU67) provides the number of times 4 Jackpots or more were awarded.

Ramp Double Jackpot (E AU68) provides the number of times the Ramp Double Jackpot was awarded.

Timer Double Jackpot (E AU69) provides the number of times the Timer Double Jackpot was awarded.

Quad Jackpot (E AU70) provides the number of times the Quad Jackpot was awarded.

Stunt 1 (E AU71) provides the number of times the Stunt 1 Feature was awarded.

Stunt 2 (E AU72) provides the number of times the Stunt 2 Feature was awarded.

Stunt 3 (E AU73) provides the number of times the Stunt 3 Feature was awarded.

Stunt 4 (E AU74) provides the number of times the Stunt 4 Feature was awarded.

Stunt 5 (E AU75) provides the number of times the Stunt 5 Feature was awarded.

Super Stunt (E AU76) provides the number of times the Super Stunt Feature was awarded.

Super Spinner Ready(E AU77) provides the number of times the Super Spinner Feature was started.

Crazy Riggs (E AU78) provides the number of times the Crazy Riggs Feature was awarded.

Leo Getz Award (E AU79) provides the number of times the Leo Getz Feature was awarded.

Super Leo Getz (E AU80) provides the number of times the Super Leo Getz Feature was awarded.

Getaway Award (E AU81) provides the number of times the Getaway Feature was awarded

Looping Award (E AU82) provides the number of times the LoopingFeature was awarded

Max # of Ramps (E AU83) provides the maximum number of Ramps completed in a single game.

Super Lethal Weapon (E AU84) provides the number of times the Super Lethal Weapon Feature was awarded.

MPlus to 5M Award (E AU85) provides the number of times the Million plus Feature was increased to 5 Million.

Start Fight (E AU86) provides the number of times the Boxing match Feature was started.

Left Orbits (E AU87) provides the total number of left orbits completed.

Right Orbits (E AU88) provides the total number of right orbits completed.

Showdown Victorys (E AU89) provides the number of times the Showdown Feature was won by the player.

Showdown Defeats (E AU90) provides the number of times the Showdown Feature was lost by the player.

Showdown Bonus (E AU91) provides the number of times the Showdown Feature awarded a bonus for completing all six shots.

Video Mode (E AU92) provides the number of times the Video Mode was enabled.

Victory Ramps Awarded (E AU93) provides the number of times the Victory Ramp was Awarded.

Music 1 (E AU94) provides the number of times Music 1 was selected.

Music 2 (E AU95) provides the number of times Music 2 was selected.

Music 3 (E AU96) provides the number of times Music 3 was selected.

Won Fight (E AU97) provides the number of times the player won the Boxing Match.

Notes

GAME ADJUSTMENTS

GENERAL

There are 56 adjustable functions provided to vary difficulty of play and to periodically reset audits and the high score levels. The various game adjustments are summarized in the **Game Adjustments Table** and, when accessed, are shown on the player score displays. The *Adjustment Number* is shown in the Player 3 Display, the *Description* in the Player 1 and 2 Displays, and the setting in the Player 4 Display. Access and control is provided from switches located on the inside of the coin door.

Game adjustments are accessed from the audit mode. With the audits displaying game identification and the FORWARD/REVERSE switch in the REVERSE (down) position, depress the STEP switch and E Ad56 (Expanded Adjustment 56) is shown in the Player 3 display, FACTORY RESTORE is shown in the Player 1 & 2 displays, and OFF is shown in the Player 4 display. With the audits displaying AU10 (or expanded E AU97) and the FORWARD/REVERSE switch in the FORWARD (up) position, depress the STEP switch and Ad01 is shown in the Player 3 display, REPLAY MANUAL/FIXED is shown in the Player 1 and 2 displays, and the setting is shown in the Player 4 display.

With the FORWARD/REVERSE switch in the FORWARD (up) position, depressing the STEP switch advances through the game adjustments one at a time. With it in the REVERSE (down) position, the STEP switch selects lower-numbered adjustments. To rapidly scroll through adjustments, hold the STEP switch depressed. Adjustment values are changed by operating the GAME START push-button. The FORWARD/REVERSE switch setting determines whether the values are increased or decreased. (With the FORWARD/REVERSE switch up, the value increases, with it down, the value decreases). When the STEP switch is depressed the Player 1 and 2 displays indicate REQUEST INSTALLED.

REPLAY AND GENERIC FEATURES

Replays may be adjusted either for fixed levels or for a system-adjusted manual percentage of replay awards. Four levels may be selected. Adjustments allow awarding of a credit or an extra ball as each level is exceeded. With the manual percentage feature, if the actual replay percentage is higher or lower than that desired, the game computes new recommended manual percentage score(s). When the coin door is subsequently opened the player displays indicate the recommended level and a sound is made to alert the operator of a potential change. This new level is entered into adjustments simply by pressing the game start push-button. (If the coin door is closed or you enter audits/adjustments or diagnostics, the replay level is not changed.)

REPLAYS (Ad 01 through 06)

Ad 01 Replay Manual/Fixed

- **Manual:** Adjust for percentage of awards for replay levels (1% through 50%). Proceed to Ad 02 and 03 for starting replay levels.
- **Fixed:** Lower the automatic value below 1% and Player 1 display indicates FIXED. Proceed to Ad 02 and 03 for fixed replay levels.

Ad 02 Start Replay

- **Manual:** Adjust the starting Replay 1 setting to between 20,000,000 and 9,999,000,000.

Ad 03 Levels Replay/Level 1,2,3 & 4 Replay

- Adjust the number of replay levels to be active (1 to 4). Any additional starting replay levels are automatically set to values higher than Replay 1
- Adjust Replay 1 level to between 20,000,000 and 9,999,000,000. (Same as Start Replay)
If Ad 03 is set for 2, adjust Replay 2 level to between 20,000,000 and 9,999,000,000.
If Ad 03 is set for 3, adjust Replay 3 level to between 20,000,000 and 9,999,000,000.
If Ad 03 is set for 4, adjust Replay 4 level to between 20,000,000 and 9,999,000,000.

* Some settings result in Drop-Down Tables- See Text

Ad 04 Game Awards Set for replays to award: CREDIT, EXTRA BALL, NONE or SPECIAL (when score threshold is achieved a playfield special is lit).

Ad 05 Limit FreeGame - Adjust for the maximum number of free games that may be accumulated per game; 0 to 9.

Ad 06 Limit Extra Balls - Adjust for the maximum number of extra balls that may be accumulated per game; 1 to 9 or OFF.

SINGLE-FUNCTION DIFFICULTY ADJUSTMENT (Ad 07)

Any one of five INSTALL settings for this adjustment may be activated to automatically select settings for multiple adjustments affecting game difficulty. Use the Start button to choose the difficulty level you require and press the step button to activate the setting. After activation, the individual adjustments may be readjusted if desired. Refer to Install Adjustment Table for details.

Ad 07 Game Rules - Set to EXTRA EASY, EASY, FACTORY, HARD or EXTRA HARD.

(Note - Additional game features not variable by the Expanded Adjustments may also change using this setting.)

NOVELTY / 5-BALL/ADD-A-BALL SETTINGS

The following three combinations are recommended for situations where local laws restrict certain game features regarding the use of replays or the number of balls per game:

Novelty Play Rules - Set to establish recommended settings for no free play or extra balls:

Ad 01 Manual Replay = Fixed
Ad 02 Start Replay = 00
Ad 03 Levels Replay = None
Ad 04 Game Awards = None
Ad 05 Limit Freegame = 0

Ad 06 Limit Extra Balls = 0
E Ad 14 Match Percent = Off
E Ad 20 World Record Awards= 0
E Ad 21-23 Todays 1-3 Awards= 0

5-Ball Play Rules - Set to establish recommended settings for 5-ball play:

Ad 01 Manual Replay = 07%
Ad 02 Replay Start = 145,000,000
Ad 03 Replay Levels = 01
Ad 04 Game Awards = Credit
Ad 05 Limit Freegame = 3
Ad 06 Limit Extra Balls = 3

E Ad 14 Match Percent = 04
E Ad 15 Balls/Game = 5
E Ad 20 World Record Awards = 3
E Ad 21 Todays 1 Award= 1
E Ad 47 Save 3 Banks = No
E Ad 49 Save Ramp Xballs = No

E Ad 50 Earning LW 1,2,3 = Hard
E Ad 51 Save Stunts = No
E Ad 52 3 Bank Style = Hard
E Ad 53 Spot 3 Banks = Factory
E Ad 54 Rerace Criterion = Hard
E Ad 55 Save LW 1,2,3 = No

Extra Ball Settings-To disable awarding of credits and provide awards with an extra ball make the following adjustments:

Ad 04 Game Awards = Extra Ball
Ad 05 Limit Freegame = 0
E Ad 14 Match Percent = OFF

E Ad 19 Scores Highest = No
E Ad 20 to 23 World Record & Todays High Awards= 0

GAME PRICING (Ad 08)

There are two methods available for coin switch programming; Standard and Custom. Standard pricing uses a single adjustment (Ad 08) to select a pricing scheme shown in the **Standard /CustomPricing Table**. Custom pricing is used to select additional pricing schemes defined by a Drop Down menu .

With Ad 08 set to **CUSTOM** operating the step button again initiates a drop down menu representing coin switch pulses for the left, right, and center coin slots. The prescribes the number of pulses required for one credit. For example, if *Left Coin Pulses*, was set to 02 and *Coin Switch Pulses Required for 1 Credit*, to 01 a coin in the left slot would produce two credits. Further, if *Left Coin Pulses*, was set to 01 and *Coin Switch Pulses Required for 1 Credit*, to 02, two coins in the left slot would be required for one credit.

Coin Switch Pulses Required for Bonus Credit may be set to post bonus credits when a minimum amount of coins are inserted at one time. For example, if *Left Coin Pulses* was set to 01, *Coin Switch Pulses Required for 1 Credit* to 01 and *Coin Switch Pulses Required for Bonus Credit* to 04, one credit would be posted for each of the first three coins in the left slot and two credits for the fourth coin.

Standard/Custom Pricing - Set for the desired pricing scheme from the Standard Pricing Table as indicated in the Player 1 and 2 displays. For Custom Pricing, set to **CUSTOM**. When set to CUSTOM, the following adjustments are utilized to tailor each individual coin chute.

Left Coin Switch Pulses - Set the number of pulses registered for closure of the left coin switch; 00 to 99.

Right Coin Switch Pulses - Set the number of pulses registered for closure of the right coin switch; 00 to 99.

Center Coin Switch Pulses - Set the number of pulses registered for closure of the center coin switch; 00 to 99.

Coin Switch Pulses Required for 1 Credit - Set the number of coin switch pulses required to post one credit; 00 to 99.

Coin Switch Pulses Required for Bonus Credit- Set the number of coin switch pulses required to award a bonus credit; 00 to 99.

ADDITIONAL GENERIC FEATURES

Ad 09 Game Cleaned - When enabled (set to **YES**) the game cleaning counter will be reset to zero and Game Clean-Me message in Tech Alert will go out when STEP is depressed.(Also see E Ad31.)

Ad 10 Coin Reset - When enabled (set to **YES**) all coin and paid credit totals will be reset to zero when STEP is depressed.

Ad 11 Audits Reset - When enabled (set to **YES**) all audit totals except for coins and paid credits will be reset to zero when STEP is depressed.

Ad 12 Restore High Score - When enabled (set to **YES**) the High Score Levels and associated initials will be restored to backup settings when STEP is depressed .

Ad 13 Expand Adjustments - When set to **NO**, depressing the STEP push-button advances directly to E Ad 46, FACTORY RESTORE. When set to **YES**, depressing the STEP push-button sequences through the expanded adjustments. When exiting from expanded adjustments, this function is reset to **OFF** for the next time that adjustments are required.

E Ad 14 Match Percent- Set Match percent from **00%** to **10%** or **OFF**. At 00% the match display occurs at the end of the game but never awards a credit.

E Ad 15 Balls Per Game - Adjust the number of balls per game; **2** to **5**.

E Ad 16 Tilt Warnings - Adjust the number of plumb bob tilt switch closures before the ball in play is tilted; **1** to **3** or **OFF**.

E Ad 17 Replay Boost - Set to **YES** or **NO**. When set to **YES**, exceeding a replay will set a temporary replay level for each time a replay level is surpassed. This new level will equal the player's final score (when the replay was awarded) for each following game, until the replays have all been played. At this time the previous level is resumed.

E Ad 18 Credits Limit - Adjust the maximum number of credits that may be posted; **4** to **50**.

HIGH SCORE LEVELS (E Ad 19 through 30)

There are four of the six high score levels with associated player initials that are displayed during the attract mode. This provides a high-score-to-date feature. When players exceed these levels, the player initials may be entered to replace the previous ones. These levels may be adjusted to award credits and to be reset to backup values after a selected number of games.

E Ad 19 Hiscores Allowed - Set to enable or disable the four high score levels; **YES** or **NO**.

E Ad 20 World Record - Adjust the number of credits awarded for exceeding level 1 (the highest of the four levels); **0** to **5**.

E Ad 21 Highscore 2 Award- Adjust the number of credits awarded for exceeding level 1; **0** to **3**.

E Ad 22 Highscore 3 Award - Adjust the number of credits awarded for exceeding level 2; **0** to **2**.

E Ad 23 Highscore 4 Award - Adjust the number of credits awarded for exceeding level 3; **0** to **1**.

E Ad 24 Backup World Record - Adjust the score level to which the world record (the highest of the four levels) may be altered. This adjustment is not affected by E Ad30 (Factory Reset defaults to 7,500,000).

E Ad 25 Backup Highscore 2 - Adjust the backup score level to which level 1 may be reset.

E Ad 26 Backup Highscore 3- Adjust the backup score level to which level 2 may be reset.

E Ad 27 Backup Highscore 4- Adjust the backup score level to which level 3 may be reset.

E Ad 28 Backup Highscore 5- Adjust the backup score level to which level 4 may be reset.

E Ad 29 Backup Highscore 6- Adjust the backup score level to which level 5 may be reset.

E Ad 30 High Score Reset Every - Adjust the number of games between automatic resets of high score levels to backup settings and ball time averager adjustments; 100 to 900 or OFF (no reset or adjustment).

E Ad 31 Clean Game Every- Adjust the number of games in which the Clean Game message appears in Tech Alert to indicate the playfield needs cleaning. Adjustable from 100 to 2000.

E Ad 32 Free Play - When set to YES, no coins are required for games.

E Ad 33 Custom Message - When desired, this function is used to establish a custom message periodically displayed during the attract mode. Set the feature to CHANGE using the Credit button and depress STEP. The letter A is indicated in the first position of the Player 1 display. Vary the letter by operating the left and right flippers. With the desired letter indicated, depress the CREDIT button to lock in the letter and advance to the next display character. Repeat this procedure until the desired message is indicated in the Player 1 and 2 displays. At this time, depress the STEP push-button switch to advance to E Ad 34.

E Ad 34 Attract Mode Music - Set to ON (approximately every 3 minutes), or OFF.

E Ad 35 Flash Lamps- Set to NORMAL, DIM or OFF. When set to NORMAL the Flash Lamps are active, when DIM the Flash Lamps impulse power is reduced by 25% and when OFF the Flash Lamps do not flash.

E Ad 36 Coils Pulse- Set To NORMAL, HARD or SOFT. When HARD the coil pulse power is increased by 12.5% of the normal pulse rate. When set to SOFT the coil pulse power is reduced by 12.5% of the normal pulse rate. These adjustments are provided to compensate for Low Line or High Line voltage conditions where the solenoids appear to kicking too weak or too hard.

E Ad 37 Level Adjust by - When set to OPERATOR, the Manual Percentage Replay Adjustment can only be altered with the front door open (see manual page 3). When set to ANY, the Manual Percentage Replay Adjustment will display the message "PRESS START TO CHANGE REPLAY LEVEL" on power up if a change is recommended, and anyone operating the replay button will initiate the change to the replay score.

E Ad 38 Install Country- Set to USA, GERMAN, FRENCH, AUSTRIA, BELGIUM, SWISS or CANADA. Determines the default settings for the respective country for game pricing etc.

E Ad 56 Factory Restore-Depressing STEP without changing the value shown in the Player 4 Display locks in any custom message set with E Ad33 and returns the game to GameOver. Set the value to ON and depress STEP switch to revert all game adjustments to factory settings, clear the Custom Message and return to Game Over.

GAME SPECIFIC FEATURES (E Ad 39 TO E Ad 54)

E Ad 39 Next Game Promo- Set to ON or OFF. When set to ON, the game, in attract mode will randomly display a short promotion for our next game. When set to OFF, the game in attract mode will not generate any sounds or graphics referring to the next game.

E Ad 40 Buy in Enabled - Set to YES or NO. When set to YES, the game will display a countdown timer at the end of each game allowing the player to "Buy in" most of the features accumulated during the previous game. When set to NO, none of the previous game features will be retained and no countdown timer will appear.

E Ad 41 Game Restart -Set to YES or NO. When set to YES, a new game may be started during any ball after the first ball is completed. (Note-Pressing start during the first ball will add additional players.) When set to NO, The game disables the start button after the first ball until the final ball is in play.

E Ad 42 Extra Ball Percentage -Set from 0 to 50. Allows the operator to adjust how frequently the Extra Ball feature is made available to the player.

E Ad 43 Background Volume - Set to 0, 25, 50, 75 or 100 percent. Allows the operator to adjust the background music volume independantly from the normal game sounds.

E Ad 44 Bill Validator - Set to YES or NO. When set to YES , the display, in game attract mode, will show an "Insert Bill Animation". When set to NO, the display, in game attract mode will show "Insert Coin Animation".

E Ad 45 Police Light -Set to ON or OFF. When set to ON, the flashing police light on the top of the Backbox will be active during Multiball. When set to OFF, the light will be disabled.

E Ad 46 Gun Enabled -Set to YES or NO. When set to YES, The ball launch kicker will fire during video mode every time the trigger is operated. When set to NO, the ball launch kicker will not operate during video mode.

E Ad 47 Save 3 Banks - Set to YES or NO. When set to YES, the status of the Drop Target lamps lit will be retained from ball to ball for the same player. When set to NO, the lamps will be reset with each new ball in play.

E Ad 48 Save UZI - Set to YES or NO. When set to YES, the status of the UZI lamps lit will be retained from ball to ball for the same player. When set to NO, the lamps will be reset with each new ball in play.

E Ad 49 Save Ramp Xballs - Set to YES or NO. When set to YES, the number of ramps completed will be retained in memory from ball to ball for the same player. When set to NO, the number of ramps completed will be reset with each new ball in play.

E Ad 50 Earning LW 1,2,3 - Set to EXEASY,EASY,FACTORY, HARD or EXHARD. Determines how the 1,2 & 3 holes must be completed to award a stunt.

EXEASY	EASY	FACTORY	HARD	EXHARD
Any order	Any order	Any order	In Sequence after 2nd Stunt	In Sequence

E Ad 51 Save Stunts -Set to YES or NO. When set to YES, the number of stunts completed will be retained in memory from ball to ball for the same player. When set to NO, the number of stunts completed will be reset with each new ball in play.

E Ad 52 3 Bank Style -Set to EXEASY,EASY,FACTORY, HARD or EXHARD. Determines how the Drop Targets must be completed to advance their Value.

EXEASY	EASY	FACTORY	HARD	EXHARD
Completing either bank advances the value on both banks	Same as EXEASY until the 3rd Multiball then same as HARD	Same as EXEASY until Multiball then same as HARD	Completing either bank advances its own lit value	Completing both banks advances both lit values

E Ad 53 Spot 3 Banks -Set to EXEASY,EASY,FACTORY, HARD or EXHARD.Determines when the game will automatically "spot" a lit value on the Drop Target banks.

EXEASY	EASY	FACTORY	HARD	EXHARD
Always	Always, before Multiball	Always, except when completing either bank advances both banks	Before 1st Multiball, except when completing either bank advances both banks	Never

E Ad 54 Rerace Criterion -Set to EXEASY,EASY,FACTORY, HARD or EXHARD. Determines during multiball, when a drained ball will be kicked back into play.

EXEASY	EASY	FACTORY	HARD	EXHARD
If no Jackpot was completed or Multiball time is low.	If no Jackpot was completed	If multiball time is low.	If no Jackpot was completed and Multiball time is low.	Never

E Ad 55 Save LW 1,2,3 - Set to YES or NO. When set to YES, the holes (1,2,&3) completed will be retained in memory from ball to ball for the same player. When set to NO, the holes completed will be reset with each new ball in play.

GAME DIAGNOSTICS

The Data East Pinball system provides tests for sounds, digital displays, lamps, switches, and solenoids. Each feature may be tested manually or automatically using the STEP and FORWARD/REVERSE push-button switches inside the coin door and the Game Start push-button switch on the front of the cabinet. The automatic tests may be used for a quick verification of automatic test functions and the manual tests, for troubleshooting.

During game play, activation of switches and operation of coils with associated switches are monitored. If a switch is not made for 50 games it is considered bad. When operation of a coil should close or open a switch and does not, the coil is considered bad. In Game over attract mode, bad switches and coils (if any) are reported (See Tech Alert Description below). Note that reporting of an unused switch does not constitute a problem and that a bad coil could mean that the associated switch requires adjustment.

Wiring to switches, solenoids and controlled lamps uses color-coded wires that basically follows a resistor color-code scheme for the eight rows and eight columns. During the switch tests and during the discrete lamp test, identification of the color of the row and column wires are indicated in the Player 3 & 4 Displays. For example, making the right coin switch during the Switch Test results in the switch functional name (RIGHT COIN) shown in the Player 1 and 2 Displays, the row (WHT-YEL) and column (GRN-BRN) wire color codes shown in the Player 3 display, and the switch number shown in the Player 4 display.

BLK=Black
BRN=Brown
RED=Red
ORN=Orange
YEL=Yellow

GRN=Green
BLU=Blue
VIO=Violet
GRY=Grey
WHT=White

ENTERING DIAGNOSTICS

With the game in the game-over mode, open the coin door and make sure that the FORWARD/REVERSE push-button switch is set to REVERSE (down) and depress the STEP push-button switch. The Player displays will show the tollfree Customer Service number 1-800-KICKERS, that is 1-800-542-5377 (U.S. including Illinois) and the toll number (708) 345-7700 (Outside the United States). this indicates entry into game diagnostics.

Service Credits

With the phone number displayed depress the STEP push-button switch. The game now gives the technician the option of adding 1 to 5 service credits. These credits allow the technician to test-play the game without adding any counts to the coin audits (AU 01 & AU 05-AU 08). When the message appears, press and hold the Game Start pushbutton until the desired number of credits are shown on the display. Then press the step button again to add these credits to the game and enter Tech Alert. If no Service Credits are desired, press the step button with the initial message displayed.

Tech Alert

The player displays will now indicate if there are any Bad Switches (Switches that are closed, that should not be or switches that have not been activated in 50 games) it also indicates if the game requires cleaning, based on the number set in E Ad 31.

Burn-In Minutes

Pressing the step button while in Tech Alert mode will step game into Burn-in Mode(Factory use). At this stage pressing the game start button will cause the game to exercise all CPU I/O functions. This is provided to constantly exercise sounds, solenoids, etc...

To stop the test press the start button again. Cumulative Burn-In minutes will be displayed. To reset Burn-In minutes to 00, you must perform a Audit Reset Ad 11 or a Factory Restore E Ad 56.

SOUND TESTS

The Data East Pinball sound system produces true digital stereo sound on left and right speakers and mono on a center speaker. During Sound tests, the bottom display shows the sound board circuit under test and the corresponding sounds are selected by operating the left and right flipper buttons to choose the circuit to be tested. Now press the start button to initiate the sound. Refer to the Sound Test Chart for the sound circuits displayed and the sounds produced.

The sound functions allow verification that all channels are functioning properly and that the speaker connections are correct. Speaker Phase Testing procedures follow for checking speaker connections.

SOUND TEST CHART

Auto/Manual Tests (Player 1 & 2)	Sounds Produced
LEFT SPEAKER CENTER SPEAKER RIGHT SPEAKER VOICE ROM1 (Loc U17) VOICE ROM2 (Loc U21) MUSIC TEST (Sound ROM Loc U7)	Left Sine (Left Speaker Only) Center Sine (All speakers) Right Sine (Right Speaker Only) "Here comes Trouble!" "We're back in action!" Level 1 Through Level 3 Music

Speaker Phase Testing

Connections to each of the three speakers are polarized and each must be connected appropriately for the best quality sound. If one speaker has the positive and negative connections reversed with respect to the other two, bass frequencies will not be produced properly and the overall sound quality will be poor.

To test for proper speaker phasing, use the sound test to cycle through the Left, Center, and Right Sine functions. If the Center Sine produces more volume and bass than the Left and Right Sines, the speakers are connected properly. If it produces the same or less, one speaker is connected improperly. To isolate and correct reversed speaker connections, one of two methods may be used.

1. Check each speaker for polarity markings. If the speakers have polarity markings, verify that the single-color wire (BLK, YEL or RED) is connected to the negative (-) terminal.
2. Disconnect the speaker output connector from the Sound Board and connect a 1.5-volt battery across each speaker pair one at a time while observing the speakers. Make sure that the positive battery terminal is connected to the positive lead (CN1-pin 1, 3, or 6) each time. As the connection is made, check speaker cone movement; proper connections are indicated by outward movement.

DIGITAL DISPLAY TEST

The Digital display utilizes a Dot Matrix Display Control board mounted in piggyback fashion to the display driver Board. The purpose behind this board is to provide more information (32 X 64 Dots) to the operator as well as displaying graphics to the player.

The board is controlled by a 68B09E microprocessor and it's personality ROMs (Unique to the Game) . It receives Data, Reset & Clock information from the CPU Board via the ribbon cable and sends back multiple Status and Busy signals to the CPU . This is to insure synchronized communication between the CPU and the Display Controller board.

The Drivers for the rows and columns are provided on 4 surface mounted integrated circuits on the Display driver board.

Automatic Test

To enter Display tests, operate the STEP push-button switch from the Sound Manual test. The displays will first illuminate one vertical column of dots in the Display. After a slight delay it will cycle one column from left to right. After a period of time, it will begin the Row test by lighting the top row of the display, then turning it off and illuminating the next row, until each row has been individually lit, while the other rows are off. The test will then turn all the dots in the display on except for one column. It will then cycle this blank column from left to right. After a period of time, it will begin the second Row test by blanking the top row of the display, then turning it on and blanking the next row, until each row has been individually blanked, while the other rows are on. The next test begins with every other dot lit, in both the rows and columns. These dots then go out, and the unlit dots light, resulting in an alternating checkerboard pattern. The test will then repeat these cycles again until advanced to the next test or until the power is removed. (Please Note- these tests may be interrupted at any time by operating the STEP push-button switch to advance to the next test.)

Laser Kick Test

This test provided to insure proper interaction between certain switches and their associated solenoids without entering game play. For example, by rolling the ball over the left outlane switch the Laser Kick should fire. If it kicks too early or too late, the switch actuator should be adjusted to compensate for this error. If it fails to fire, use the switch test or coil test to help determine the cause of failure. Note: During this function, similar tests may be performed on Vertical Up Kickers or Saucers in the game.

Switches

Switches are configured in an 8 x 8 matrix of columns (switch drives) and rows (switch returns) with up to 64 switches possible. The switch tests include three parts; switch test, active switches, and bad switches. Row and column wire colors are indicated in each test using corresponding resistor color code numbers.

Switch Test

From the Laser Kick test, operate STEP push-button switch. Player 1 and 2 displays indicate SWITCH TEST. Close each switch and observe the displays. The Player 1 and 2 displays will indicate the switch name, the Player 3 display indicates the row and column wire colors, and the Player 4 display indicates the switch number. When a switch is released, the name and number disappear until another switch is closed or the test is exited.

Active Switches

Operate the STEP push-button switch from the Switch Test. Player 1 and 2 Displays indicate ACTIVE SWITCHES. If any switches are stuck closed (or made from the presence of a ball), the Player 1 and 2 displays sequence through switch names, the Player 3 display indicates the row and column wire colors, and the switch numbers are indicated in the Player 4 display. This cycle continues until all switches are cleared or until the STEP push-button switch is depressed.

LAMP TESTS

Controlled lamps are configured in an 8 x 8 matrix of columns (lamp drives) and rows (lamp returns) with up to 64 lamps possible. The lamp tests include four parts, all lamps, lamp return (row), lamp drive (column), and discrete (individual) lamps. Row and column wire colors are indicated in the discrete lamp test using corresponding resistor color code numbers.

All Lamps

From the Active Switch test, operate the STEP push-button switch. Player 1 and 2 displays indicate ALL LAMPS and all controlled lamps will light.

Lamp Returns

From the ALL LAMPS test, depress the STEP push-button switch. The top display indicates LAMP RETURNS and the Bottom display indicates wire color and the LAMP RETURN driver transistor. All controlled lamps in row 1 should be lit. Operating the Game Start push-button switch cycles through each of the rows separately.

Lamp Drives

From the LAMP RETURNS test, depress the STEP push-button switch. The Top display indicates LAMP COLUMNS and the bottom display indicates wire color and the LAMP DRIVES driver transistor. All controlled lamps in column 1 should be lit. Operating the Game Start push-button switch,cycles through each of the columns separately.

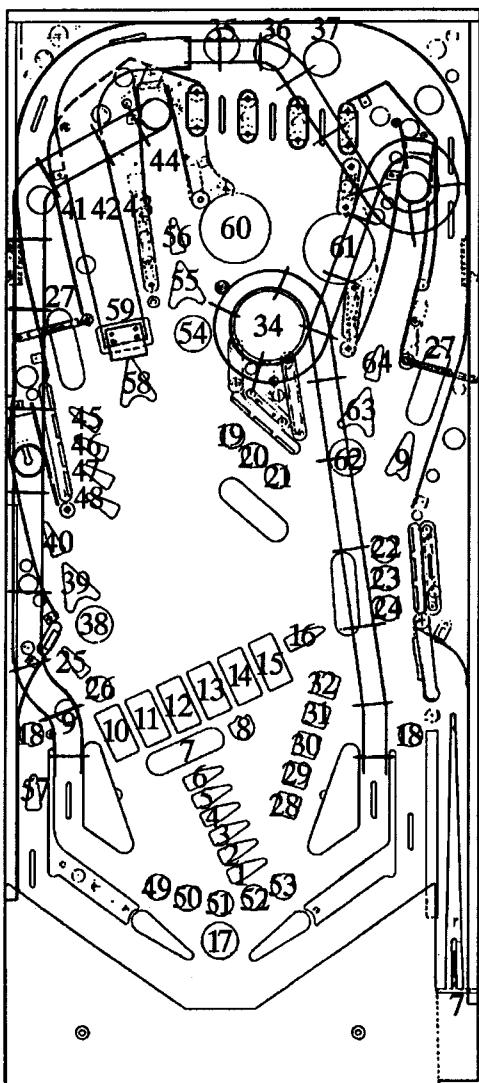

SingleLamp

From the LAMP DRIVES test, depress the STEP push-button switch. The top display indicates lamp name. The bottom display indicates the row and column wire colors and the lamp matrix number. Lamp 01 should light. With the FORWARD/REVERSE push-button switch in the FORWARD (up) position, operating the Game Start push-button switch selects higher-numbered lamps; with it in the REVERSE (down) position, Game Start selects lower-numbered lamps.

FLASH LAMP COIL TESTS

Twenty-Two regular (pulsed under microprocessor control) coil drivers are provided to switch ground to coils. The Left/Right relay is used in conjunction with drives 1 through 8 to switch +32 volts between coils or flash lamps; these sets are termed "left" and "right". This relay is located on the PPB board which provides isolation diodes and current limiting resistors. This effectively provides 29 regular coils.

Flash Lamp

Flash Lamp From the Single Lamp test, depress the STEP push-button switch. All Flash lamps will fire randomly. This allows the Technician to easily spot any burned out bulbs and replace them without stepping through the tests below.

Automatic Test

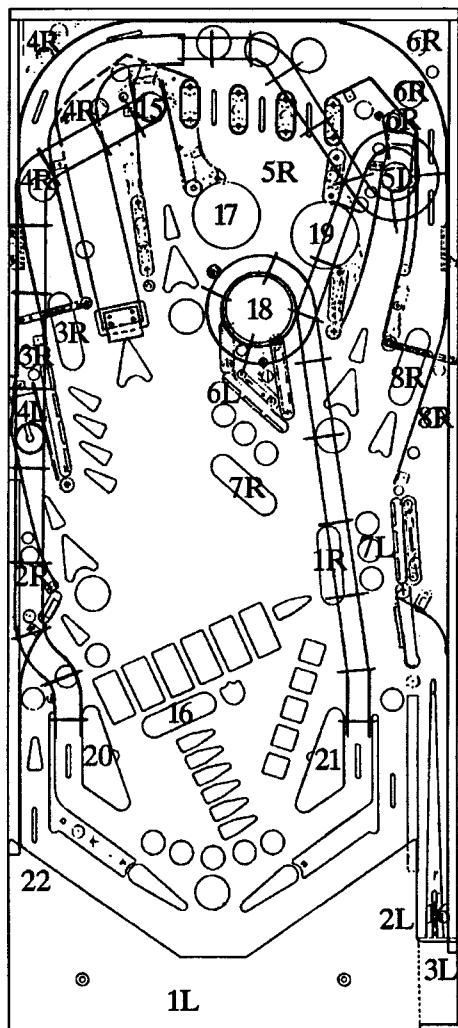

Automatic Test: From the Flash Lamps test, depress the STEP push-button switch. Player 1 and 2 displays indicate ALL COILS. The test pulses each regular solenoid or flash lamp sequentially with the coil/flash lamp name indicated in the Player 1 and 2 displays and the wire colors in the Player 3 and 4 displays.

Select Coil

From the Coil Test, depress the STEP push-button switch. Player 1 and 2 displays indicate SELECT COIL and then the name of 1st drive , the wire colors are indicated in the Player 3 and 4 displays. Operate either Flipper push-button switch to select the coil or flash lamp to be tested. With the desired drive number indicated in the Player 4 display, depress the START push-button switch to cause it to be pulsed repeatedly.

RETURN TO GAME OVER

From the Select Coil test, depress the STEP push-button switch once. The game returns to the game-over mode.

Theory of Operation for the Solid State Flippers

- The solid state flipper board is a dual flipper solenoid driver circuit. Each solenoid driver circuit contains a one shot timer, a 50V driver, and an 8V driver.

Looking at one circuit, Schmidt NAND gates U1A, U1B, and U1D make up the one shot timer. The timer length is controlled by R10, R33 and C2. The output of the timer is gated at U1C with the buffered switch input from Q6. The output of U1C controls the 50V driver circuit consisting of Q4, Q1, Q2, Q3, and D1. As long as the flipper button is activated, Q6 will keep the 8V driver circuit, SR1, on.

The 50V provides the actuation power to the flipper solenoid while the 8V provides the holding power.

DATA EAST LIMITED WARRANTY

Data East USA, Inc., ("Seller") warrants only to the initial purchaser of its products that the items listed below are free from defects in material and workmanship under normal use and service for the warranty period specified:

PRINTED CIRCUIT BOARDS (GAME LOGIC) 60 DAYS

No other parts of Seller's product are warranted.

Warranty periods are effective from the initial date of shipment from Seller to its authorized distributors.

Seller's sole liability shall be, at its option, to repair or replace products which are returned to Seller during the warranty periods specified, provided:

1. Seller is notified promptly upon discovery by purchaser that stated products are defective.
2. Such products are properly packaged and then returned freight prepaid, to Seller's plant.

This warranty does not apply to any parts damaged during shipment and/or due to improper handling, or due to improper installation or usage, or alteration. In no event shall the Seller be liable for any anticipated profits, loss of profits, loss of use, accidental or consequential damages or any other losses incurred by the customer in connection with the purchase of a Data East USA., product.

WARRANTY DISCLAIMER

EXCEPT AS SPECIFICALLY PROVIDED IN A WRITTEN CONTRACT BETWEEN SELLER AND PURCHASER, THERE ARE NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

WARNING--This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions manual, may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference when operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference in which case the user at his own expense will be required to take whatever measures may be required to correct the interference.
