RE: Jurassic Park - EPROM Rev. 5.10

Symptom: We have found a condition that occurs in some games, in *Game Over Mode*. The display blacks out for approximately 15-30 seconds.

Problem: There is a communication error between the game C.P.U. and the display board C.P.U. at which time the game micro-processor goes into a wait status which times out in approx. 15-30 seconds.

Solution: Install CPU/DISP EPROM Revision 5.10.

Note: If further assistance is required, please call Joe Blackwell @ 1-800-KICKERS (1-800-542-5377).
